

# Young Innovators Bazaar 2026

## NP ZONE Wins

# “Best Team Spirit Award”

Our school participated in the Young Innovators Bazaar 2026, held at Hollywood Plaza from 13 to 15 March. They set up a stall named “NP ZONE” to promote the lifestyle attitude of self-care and facing emotions positively. The stall received enthusiastic support from teachers, students, and members of the public.

The activity aimed to give students a real experience of the entire entrepreneurial process. From product design and promotion to on-site sales, everything was handled entirely by the students themselves. Through this hands-on experience, they learned valuable lessons in teamwork, communication skills, and problem-solving. The team ultimately won the “Best Team Spirit Award” at the event, an achievement that was highly encouraging. Professor Frederick Si-Hang MA, GBS, JP, Chairman of the Hong Kong Trade Development Council, personally visited the stall to show his support and purchased products from the team.

The name “NP ZONE” comes from the abbreviation of “No Problem”. The team hoped that through their creative products, they could remind everyone not to forget to take care of their inner world amid their busy studies and daily lives.

Student sells the product to Prof. Ma

### Products made by students

During the preparation period, the team had to remake some products due to the humid weather. Instead of feeling discouraged, the students viewed the challenge as an opportunity for growth and demonstrated remarkable resilience and perseverance.

After the event officially began, the team's outstanding performance caught the attention of the judges, and their stall was selected as one of the key booths for the judges to visit. The judges praised the creativity of the products and the caring philosophy behind them. Thanks to the seamless cooperation and enthusiastic dedication of all team members, "NP ZONE" successfully won the "Best Team Spirit Award", fully recognizing the unity and positive attitude shown by the students throughout the entire process.

The team fully demonstrated a spirit of mutual support during the event. Members divided tasks according to their strengths, with some handling sales, others managing packaging, and some taking care of cashier duties. Everyone performed their roles effectively and cooperated seamlessly, which was the key reason they won the "Best Team Spirit Award".

The team also thanked all the supportive teachers, classmates, and customers. They hope that through the "NP ZONE" stall, the positive message of self-care can be passed on to more people, encouraging everyone to maintain a relaxed mindset no matter what challenges they face — because everything is No Problem.

This activity not only allowed students to experience the taste of entrepreneurship but also enabled them to learn the importance of perseverance, cooperation, and gratitude through real practice. Winning the "Best Team Spirit Award" is undoubtedly the best affirmation of the team's hard work and a memorable and valuable learning experience.
